## FABRICA PISTA

Our FABRICA TRACK frame will make the difference when you will find yourself at the race track or at the local velodrome.

A real track geometry; as you can see from our geometry chart, we designed a very compact frame thanks to short chainstays and seat tube / head tube angles. All the parts and details on this frame are custom designed and made by us in-house; our dropout design will give you extra rigidity in such critical area preventing oxidation and rust since they are lasercut from 6mm thick stainless steel plate. The frame is built using a fine Columbus tubing selection thought to realize a very stiff frame, thanks to the round

shaped chain stays we designed and are produced exclusively for us. The massive 44mm diameter down tube and the oval seat stays are oriented to give you the best lateral stiffness when you sprint. The Columbus Pista leggera fork completes the frame kit.

ALSO AVAILABLE WITH COLUMBUS XCR TUBINGS!

## FABRICA PAINT WORKS

Our Official paint scheme is 3 colors based:

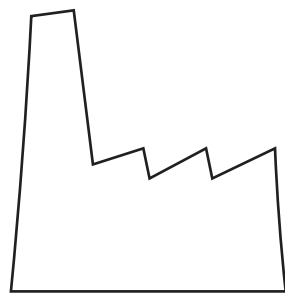

- 1 main color
  - 2 text, logo and edge color.
  - 3 label color + fork sock
- Internal fork color is set as label color.

You can mix it as you want choosing from a color chart and giving us a reference. We can offer matte, metallic, pastel finishings. You can see some frames we made and get inspiration.

We also make full custom graphics, painted stem and seatpost.
